EDUCATION

The University of Akron — Akron, Ohio

Aug 2026

Bachelor of Science in Computer Information Systems | GPA: 3.0

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, C++, SQL, HTML5, CSS3
- **Frontend:** React, Tailwind CSS
- **Backend:** FastAPI, REST API design, JWT authentication
- **Databases:** PostgreSQL, SQLAlchemy ORM
- **Tools:** Git, GitHub, VS Code

WORK EXPERIENCE

Undergraduate Research Assistant — Cyber Forensics

May 2026 – Aug 2026

- Contributing to the development and testing of digital investigation tools used to analyze cybersecurity incidents and process forensic evidence.
- Supporting the collection, preservation, and analysis of digital evidence following standard forensic procedures to maintain integrity and chain of custody.
- Assisting a faculty-led cyber forensics summer camp by preparing technical presentation materials and demonstrations for high school students.

PROJECTS

Tournament Management Platform

React · TypeScript · Python · FastAPI · PostgreSQL · SQLAlchemy ORM · Tailwind CSS · REST API

- Full-stack web developer with experience building responsive React/TypeScript applications using Vite, Tailwind CSS, and modern component-based architecture.
- Developed backend services with Python, FastAPI, SQLAlchemy, and Pydantic, implementing REST APIs, JWT authentication, and relational database models.
- Skilled in integrating frontend and backend systems through Axios, React Router, and secure data handling for user, tournament, and match workflows.

Personal Portfolio Website

React · Tailwind · TypeScript · Responsive Design

- Designed and built a personal portfolio website from scratch with React and Tailwind to showcase projects, skills, and contact information in a clean, organized layout.
- Added interactivity with DaisyUI and applied responsive styling so the site adapts across desktop and mobile screen sizes.

Tournament Management REST API

Java 17 · Spring Boot 3 · Spring Data JPA · PostgreSQL · Maven

- Developed RESTful backend service in Java and Spring Boot 3 with layered architecture (Controller, Service, Repository), Spring Data JPA for database access, and 8+ endpoints for tournament management operations
- Built single-elimination bracket generation algorithm using binary tree structure with seed-based pairing and automatic winner advancement, implemented with `@Transactional` annotations for atomic multi-entity operations
